# MojoNet

Re-imagining the internet

Problem
1   Lack of privacy for web users

2   This limits people's freedom and ability to use the web expansively

3   That is where MojoNet comes in

Utopia

**1** 100% privacy by decentralization

2 We will give users the space and opportunity to use the web as freely as possible

3 What exactly is this so called MojoNet

MojoNet

A decentralized web like network of peer to peer users.

Timing

1. The world is more and more towards tech advancements and access to free and credible information

2. Every single person uses the web and values their privacy. Many internet users have the fear of being embarassed on the World Wide Web

3. We think that now is the time for us to provide this service to the world

MojoModes

The two ways you can use MojoNet

Angel's Mode

Enjoy censorship of the content you consume and block content they feel isn't appropriate for you.

Devil's Mode

Almost zero censorship, the user can whistle blow information and have freedom to express themselves anonymously
Direct Competitors

Indirect Competitors
Competitive Advantages

MojoNet is one of a kind.
Here's why

Advantage 1

Open , free and uncensored network and communication.

Advantage 2

No or minimal hosting costs, sites are served by visitors and the users. No servers will be used.

Advantage 3

Impossible to shut down, its everywhere because its nowhere
Advantage 4

Fast and works both online and offline, you can access the site even if your internet is unavailable.
The system saves over 1 terabyte of data offline.

Advantage 5

The user can send emails with no internet at all to his/her peers

Competitor Approach

1 MojoNet is relatively new to the global market, our uniqueness is found in the sense that a project of this magnitude has never been done successfully. We believe that many users and the general population believes in positive change

2 Rapid advertising of MojoNet is planned and we predict that we will pull a lot of users our way. Gorilla marketing and other successful modes of marketing will be spearheaded by our partners at MM Advertising Africa. This will give us a more than marginal competitive advanatage

Revenue

1 January - February 2022
Polishing MojoNet and testing version 1

2 March-June 2022
Heavy marketing through social media influencers and other means

**3** June 2022 onwards
Heavy push to the success of MojoNet

Valuation

According to our extensive research on MojoNet's field,
There is a capability of making up to $200 million annually in the long run.
We are willing to give up up to 30% stake to investors.

Future Roadmap

We are hopeful that in the first five months of 2022, we may raise our series A investment up to $1.5 million

Series A investment

Version 1 of MojoNet on service

Series B investment

In 2023, approximately $2 million

Series C investment

In 2024, open public investment
